Confirmation on the business of MediAcion in Germany

To whom it may concern,

this letter is to confirm that the company MediAcion and its business is known to the Federal Ministry of Health and that CEO Dr. Becker-Ebel has presented himself personally to our department on October 28, 2014.

The courses offered by MediAcion are accredited by the statutory health insurance in Germany and CEO Dr. Becker-Ebel is a member of the national association for palliative care (DGP).

As a private company and service provider in Germany, MediAcion does not receive preferential treatment from the Federal Ministry of Health. However, the German Federal Ministry for Health welcomes initiatives by civil medical organizations to support capacity building in medical professions around the world and strives to facilitate the exchange between these organizations.

Jannes Elfgen, Policy Officer
